OSH Department 2023 Throwback

As we begin the year 2024, let us not forget the well-known safety slogan that reminds us to "Stop! Think! Act!" I-Systems College in Kuching, Sarawak, plays a vital role in promoting Occupational Safety and Health (OSH) beyond the state and the nation.

The OSH department is ready to face new challenges and embark on another chapter of growth with the students this year.

In 2023, the college resumed face-to-face learning and provided the students with the necessary toolset, skillset, and mindset required to succeed in their OSH journey and career. As the students return to college and prepare for their

education, reflecting on the previous year will serve as a testament to what they can expect and achieve.

Some great events worth celebrating in reflection:

- OSH students completing their diploma program in convocation,
- OSH charity run and cleaning day,
- OSH program rebrand project presentation,
- Educational visit to inspiring Petrosains, The Discovery Centre,
- Safety and Health Committee initiative on reverse parking is safety.

The smiles on the students' faces continue to motivate us to grow and achieve even more as we enter 2024. We look forward to inspiring the students with more events and activities that will complement their studies and growth with the college as they prepare themselves for a successful career in safety and health.
